

START STRONG, FINISH STRONGER.

Let CUnet help you identify challenges and meet them.

Leverage your existing resources and make them more effective, efficient, and successful through CUnet's School Operations Consulting service. Our team of subject matter experts brings your team to a whole new level, resulting in increased enrollment, retention, and alumni engagement.

At CUnet, we work closely with our school partners to drive results, and we have the experience and success stories to prove it. Our team is comprised of seasoned higher education management professionals with local, regional, and national experience—we understand the unique challenges of higher education. We help schools identify challenges, then we make clear recommendations and help implement changes.

ENROLLMENT/INQUIRY PROCESS CONSULTING

This comprehensive review of inquiry processes includes an audit of all departments involved in the enrollment process, including Admissions, Registrar, Financial Aid, Student Services/Support, and the NSC department. Our consultants conduct a competitive review before making written recommendations in an operational playbook. We help management staff execute recommendations, provide staff and management training, and conduct follow-up monitoring.

QUALITY ASSURANCE AND COMPLIANCE CONSULTING

We provide a comprehensive review of all departments to ensure they are providing superior service to students and are in compliance with national and regional accrediting institutions and USDOE regulations. Through inquiry process consulting, we help schools address enrollment and admissions compliance. Following a complete audit of current practices, CUnet can play a role in ongoing compliance through internal and external mystery shopping with weekly and monthly reporting and recordings.

SCHOOL STRATEGIC MANAGEMENT CONSULTING

We draw on our broad experience in higher education to provide a full range of strategic management consulting services, including executive coaching, technology assessments, staffing services consulting, governmental affairs, and vendor management consulting. CUnet works closely with our school partners to ensure that the recommendations we present get results.
